**GET IN TOUCH**

**01865 617 854**

## WHAT IS THE TOUCAN STUDY?

- **This study is testing new devices which aim to tell GPs whether you have a urinary tract infection (UTI). Some of these devices will also tell GPs which antibiotics will be best to use if you have an infection.**
- **By participating, you will be making a valued contribution to knowledge on how UTIs can be diagnosed faster and how antibiotics can be prescribed more accurately in future.**
- **If you decide to take part, you will be asked to provide a fresh urine sample and fill in a short questionnaire.**

## WHO CAN TAKE PART?

**Are you biologically female and over 18 years with a suspected UTI?**

**Ask your GP or the receptionist how to take part or contact us at [toucan@phc.ox.ac.uk](mailto:toucan@phc.ox.ac.uk)**
